

What is claimed is:

1. A packaging container recyclable for use as suit hanger, comprising:

5

a main body defining a receiving space for receiving merchandise therein, and having downward curved upper left and upper right corners to provide left and right shoulder portions, respectively; and a first hole being provided on a top center of said main body; and

10

a hook portion being detachably connected to said first hole on said main body.

15

2. The packaging container recyclable for use as suit hanger as claimed in claim 1, wherein at least one of two lateral ends of said main body is provided with a second hole.

20

3. The packaging container recyclable for use as suit hanger as claimed in claim 2, wherein said hook portion includes a hook at one end and a fastening button at the other end opposite to said hook, and an integrally formed fastening band extended from said end with said fastening button toward said hook;

25

and said fastening band being provided at a free
end with a fastening hole adapted to engage with
said fastening button; and said hook portion being
connected to said main body by extending said
5 fastening button through said first or said second
hole and bend said fastening band to engage said
fastening hole with said fastening button.

4. The packaging container recyclable for use as suit
10 hanger as claimed in claim 3, wherein said fastening
button of said hook portion includes a neck portion
and an expanded head portion located at an outer
end of said neck portion.

15 5. The packaging container recyclable for use as suit
hanger as claimed in claim 3, wherein said fastening
band is provided at a middle point with a groove
to facilitate easy bending of said fastening band
thereat.
